

Aastha Rai

Software Developer | AI/ML Enthusiast

📞 7011788968 | ✉️ aastharai4214@gmail.com | 💼 [Linkedin](#) | 🐙 [Github](#) | 📍 India

SUMMARY

AI Engineering student specializing in Machine Learning, Data Science, and Intelligent Systems. Proficient in Python and C, with hands-on experience building data-driven ML projects and strong algorithmic foundations through consistent DSA / LeetCode practice.

EDUCATION

Bhai Parmanand Delhi Skill & Entrepreneurship University

B.Tech AI

2024-28

CGPA: 8.96

EXPERIENCE

Coding Arena

March 2026 - June 2026

Web Developer Intern

[Certificate](#)

- Optimized front-end assets and reduced page load times, significantly improving overall performance and user experience.
- Collaborated with the development team to structure, test, and deploy clean, maintainable web components and features.

PROJECTS

DEBTRIX: AI-POWERED DEBT OPTIMIZATION PLATFORM

[GitHub](#)

- Built a full-stack fintech application using React, TypeScript, Node.js, Express, and MongoDB that helps users optimize debt repayment through AI-driven financial strategies.
- Integrated Google Gemini API to generate personalized repayment plans, comparing Snowball vs Avalanche strategies with real-time interest savings calculations and debt-free date predictions.
- Engineered interactive data visualizations using Recharts (pie charts, line graphs, progress trackers) to display EMI analytics, credit score estimation, and expense breakdowns across a multi-page dashboard.
- Implemented secure JWT-based authentication, RESTful API architecture, and a Three.js-powered animated landing page, following scalable software engineering practices for financial applications.

SMART CLAUSE CLASSIFIER AND RISK DETECTOR

[GitHub](#)

- Built an ML-powered legal tech system using Python, Scikit-learn, and NLP techniques to automate the categorization and risk assessment of complex contract clauses.
- Developed an NLP feature extraction pipeline utilizing custom text preprocessing, tokenization, stop-word removal, and TF-IDF vectorization for structured text representation.
- Trained and evaluated multiple classification models (e.g., Logistic Regression, Naive Bayes, SVM) to accurately identify high-risk legal clauses and potential compliance liabilities.
- Engineered automated document parsing and contract analysis capabilities, improving clause classification accuracy and reducing manual legal document review time.

AI RESEARCH ASSISTANT: RAG-BASED DOCUMENT INTELLIGENCE SYSTEM

[GitHub](#)

- Built a full-stack AI application using React, FastAPI, PostgreSQL, and ChromaDB that enables users to upload PDF documents and interact with them through natural language queries.
- Implemented a Retrieval-Augmented Generation (RAG) pipeline using LangChain, semantic embeddings, and vector search to retrieve relevant document context and generate accurate LLM-powered responses with source citations.
- Developed secure JWT-based authentication, document management, chat history, and a modular backend architecture, following scalable software engineering practices for AI applications.

AWARDS & CERTIFICATIONS

District Level Winner : Delhi AI Grind

[Certificate](#)

Supercontributor : Hacktoberfest 2025

[Certificate](#)

2nd Place Winner : Cyphothon

[Certificate](#)

Excel & PowerBI : Dell Technologies Certifications

[Certificate](#)

SKILLS

AI/ML : Machine Learning, Deep Learning, Natural Language Processing (NLP)

Languages : Python, C, C++, SQL, MongoDB, HTML, CSS, JavaScript (React.js, Node.js)

Tools & Platforms : Power BI, Excel, PowerPoint, PyCharm, Jupyter Notebook, Visual Studio Code, GitHub, Figma

Soft Skills : Time Management, Problem Solving, Adaptability, Communication
