

AASTHA RAI

Aspiring Machine Learning Engineer

About Me

AI Engineering student passionate about Machine Learning, Data Science, and Intelligent Systems, with a strong interest in building practical AI solutions. Skilled in Python, C, and web technologies, with hands-on experience in developing machine learning projects and data-driven applications. Actively strengthening problem-solving and algorithmic thinking through regular LeetCode practice and Data Structures & Algorithms. Enthusiastic about emerging AI technologies and their real-world applications, aspiring to contribute to innovative, ethical, and impactful AI solutions.

Certifications

- DELHI AI GRIND DISTRICT LEVEL WIINERS
- SUPERCONTRIBUTOR: HACKTOBERFEST 2025
- CYPHOTHON 2ND PLACE WINNER
- DELL TECHNOLOGIES

Project

E-LIBRARY MANAGEMENT SYSTEM [GITHUB](#)

Developed a file handling system to manage book records, enabling efficient storage, retrieval, and update operations in the e-library - Built using C language.

AI-POWERED DEBT OPTIMIZER [GITHUB](#)

Developed an intelligent financial management system that analyzes multiple debts and recommends optimized repayment strategies. Integrated AI-based insights using Gemini, EMI tracking, and financial analytics dashboard for better decision-making.

SMART CLAUSE CLASSIFIER AND RISK DETECTOR [GITHUB](#)

Built an ML-powered legal clause classification system that automatically categorizes contract clauses using Natural Language Processing techniques. Implemented text preprocessing, TF-IDF vectorization, and classification models for accurate prediction and document analysis. Tech Stack: Python, Scikit-learn, NLP, Pandas

GEETAVERSE [GITHUB](#)

Developed a web application showcasing Bhagavad Gita quotes with smooth CSS transitions, responsive design, and interactive user experience.

STUDENT PERFORMANCE PREDICTOR [GITHUB](#)

Built a Student Performance Prediction system using Machine Learning and Linear Regression. Conducted data analysis, preprocessing, and model evaluation using MAE and R² Score. Developed an interactive web application using Streamlit for real-time predictions.

FRESHHIRE AI: AI JOB SEARCH APP

[CASE STUDY HERE](#)

Built "FreshHire AI", an AI-powered job search platform for freshers in India. Created a complete PRD, defined MVP scope, prioritized features, and developed an interactive prototype using AI tools. Designed solutions for resume optimization, personalized job recommendations, and application tracking.

Education

BHAI PARMANAND DELHI SKILL & ENTREPRENEURSHIP UNIVERSITY
B.Tech 8.86 | 2024 - 28

Skills Summary

HARD SKILLS

- Languages: Python, C, SQL, HTML, CSS, JavaScript, React.js, Node.js, C++
- Tools: Power BI, Excel, PowerPoint
- Platforms: PyCharm, Jupyter Notebook, Visual Studio Code

SOFT SKILLS

- Time Management, Problem Solving, Adaptability, Communication
